Holding Pattern Computer

version 1.5

by Umberto Degli Esposti

Description

The program allow to calculate and to show the correct holding entry, introducing the holding inbound course, the aircraft heading and the holding type.

Installation

To run the program you need the Microsoft .NET 2.0 framework. This software is already installed on recent Windows and it will be even in the next version.

For all the other Windows version (98-2000-ME-XP) you need to install it.

You can download it from Microsoft website.

The component you have to download is "**Microsoft .NET Framework Version 2.0 Redistributable Package**".

The link is:
